En el dashboard que se muestra podemos obtener información de diferentes métricas como:

- **License total** – Cuántas licencias de un producto específico ha comprado el cliente en total a través de todos los canales (directo, CSP)
- **Assigned licenses** – Cuántas de las licencias adquiridas se han asignado a los usuarios
- **Unassigned licenses** – Cuántas de las licencias adquiridas no se han asignado a los usuarios
- **% Assignment** – Licencias asignadas/Total de licencias
- **Licenses from other channels** – Cuántas licencias se han comprado a través de otros canales directamente a Microsoft
- **% Purchases via Platform provider** – Licencias de otros canales/total de licencias
- **User adoption %**: Información de cuántos usuarios están utilizando las características disponibles proporcionadas por las licencias asignadas. Esta información es proporcionada por Microsoft directamente. Por ejemplo: usted podría tener un usuario que tiene una licencia de Exchange Online asignada, pero que nunca está enviando correos electrónicos. En este caso, podría considerar eliminar la licencia del usuario.
