How to check the price of a service?: Overview

- Price refers to the value assigned to a product or service, and it can change depending on the manufacturer.
- For each product, you'll see three price types: partner cost [purchase price], end-customer price [selling price], and estimated retail price (ERP) [suggested retail price].
- End-customer prices [selling price] can be adjusted by each partner as needed, using the ERP as a guideline.
