

GDAP Changes in ICP

Update may 2023

By Aldo Barrios

1. Customer creation

Once a new tenant has been provisioned in the end client's account, you will find the GDAP URL in the GDAP Invitation field, which will also contain relevant information about the status of GDAP.

Before the GDAP link is approved

CUSTOMER RELATIONSHIPS		TENANT DETAILS	
GDAP invitation	To grant GDAP permissions for Cloud Marketplace base functionality approve this link with the tenant Admin user. We suggest to copy the approval link into an incognito window before making the acceptance. Current approval status is: Pending approval by endcustomer. The approval link is valid until: 2023-04-09 20:01:46	Existing Office 365 customer	false
		Primary domain name	gdapplayground.onmicrosoft.com
		Language	Local
		Special Qualifications	None

The message that will be displayed is as follows:

"To grant GDAP permissions for Cloud Marketplace base functionality [approve this link](#) with the tenant Admin user. We suggest to copy the approval link into an incognito window before making the acceptance.

Current approval status is: Pending approval by Endcustomer."

After the GDAP link is approved

Once the client has approved the GDAP URL, the status in ICP will change. It may take around 15 minutes from the time the client approves the GDAP invitation until the status is updated in ICP.

Microsoft Organization tenant															
CONFIGURATION		LICENSE ANALYTICS		SERVICE INFO		AVAILABLE SERVICES		PROVISIONING		AUDIT LOG		SPECIAL DEAL			
CUSTOMER RELATIONSHIPS						TENANT DETAILS									
GDAP invitation	GDAP permissions for Cloud Marketplace base functionality have been granted. Current approval status is: Approved by endcustomer. Relationship Expires: 2025-01-09 07:22:31	Existing Office 365 customer	false	Primary domain name	gdapplayground.onmicrosoft.com	Language	Local	Special Qualifications	None						
INDIRECT RESELLER INFO															

The message that will be displayed is as follows:

"GDAP permissions for Cloud Marketplace base functionality have been granted. Current approval status is: Approved by endcustomer.

Relationship Expires: 2025-01-09 07:22:31"

2. Existing CSP client transitioning from another CSP provider.

When the migration to GDAP is complete, existing clients will need to accept the business relationship with the CSP provider. Additionally, clients can accept the GDAP invitation to grant permissions to the CSP provider. The user interface experience will be as follows:

Microsoft Organization tenant	
CONFIGURATION LICENSE ANALYTICS SERVICE INFO AVAILABLE SERVICES PROVISIONING AUDIT LOG SPECIAL DEAL	
▼ CUSTOMER RELATIONSHIPS	
Existing Office 365 customer invitation URL	https://admin.microsoft.com/Adminportal/Home?invType=ResellerRelationship&partnerid=ef88c6ba-3dcf-430f-82c1-73bd667f1c23&msppid=0&GDAP=true#/BillingAccounts/partner-invitation
GDAP invitation	To grant GDAP permissions for Cloud Marketplace base functionality approve this link with the tenant Admin user. We suggest to copy the approval link into an incognito window before making the acceptance. Current approval status is: Pending approval by endcustomer. The approval link is valid until: 2023-04-09 20:01:46
▼ TENANT DETAILS	
Existing Office 365 customer	true
Primary domain name	gdapplayground.onmicrosoft.com
Language	Local
Special Qualifications	None
Primary contact first name	gdaprolest1
Primary contact last name	gdaprolest
Phone	12345678

The relationship link displayed in the "Existing Office 365 customer invitation URL" field will only grant the business relationship and, therefore, the ability to transact with the CSP provider.

The link in the "GDAP invitation" field will only grant administrator permissions.

3. Changes in the Azure Plan creation

During the creation of the Azure plan, one of the steps performed by the CSP provider is related to granting permissions to the newly created Azure plan subscriptions.

To grant these permissions, the CSP provider needs to have access to the users in the client's tenant. In case the client has removed permissions to list users, the following message will be displayed to ensure that the necessary access is granted to the CSP provider. The message will include the GDAP URL as part of it.

Azure Plan (Demo Preproduction MS)
▼ PERMISSION MANAGEMENT (END CUSTOMER)

Grant End Customer Permissions *
Use this checkbox to add endcustomer permissions. If you do not wish to add customer permissions simply uncheck the checkbox.

Permission information (End Customer)
Below you can see all the users of the end customer company admin group. Please select the users that should get AOBO rights to the initial subscription created during Azure Plan creation.

Permission level (End Customer)

4. Changes for creating new Azure subscriptions within Azure Plan.

During the creation of an additional Azure subscription, one of the steps performed by the CSP provider is related to granting permissions to the newly created Azure subscription within the Azure Plan.

To grant these permissions, the CSP provider needs to be able to list the client's users. In case the client has removed permissions to list users, the following message will be displayed to ensure that the necessary access is granted to the CSP provider. Part of the message will include the GDAP URL.

1.5. Changes in the License Analytics tab

If the client is trying to view License Analytics within the tenant product and does not have permissions to load the report, they will receive a message like the following:
